DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1, 4, 13, 22 and 28 are rejected under 35 U.S.C. 102(e) as being anticipated by Korpela.

Korpela discloses mobile communications system. Fig 1 shows a mobile terminal 10, radio access networks 20(a,b,c) and three backbone networks 30(a,b,c). Fig 6 illustrates schematically the content of the protocol code files 151-153 and their relation with other elements of the signaling control software within the mobile terminal 10. As shown in Fig 6, each of the protocol code files 151-153 comprises a network layer portion for performing backbone network dependent protocols; and a mobility management layer for performing mobility management and other resource function. Further, Fig 6 shows the lower layer 131 (the physical layer, the logical link sub-layer and the link control MAC layer), the radio bearer

control layer 132 (which provide protocols to set up and manage sessions by negotiating the necessary barer capacities) and radio resource protocol 134 (claimed perform functions associated with the upper layers or lower layer in response to requests there from). See column 5, line 21- column 6, line 14; column 7, lines 35-58.

Korpela discloses an initialization mode step, a radio resource allocation mode step and an idle mode step (as in claim 28) (column 7, lines 35-58).

Allowable Subject Matter

3. Claims 2, 3, 5-12, 14-21 and 23-27 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hulyalkar et al. disclose a MAC protocol for wireless ATM.

Sipila discloses an implementation of mutual rate adaptations in data services between GSM and DECT.

Bell et al. discloses bridging and signaling subsystems and methods for private and hybrid communications systems including multimedia systems.

Rypinski discloses a hub controller architecture and function for a multiple access point wireless communication network.

Attachment for PTO-948 (Rev. 03/01, or earlier)
6/18/01

The below text replaces the pre-printed text under the heading, "Information on How to Effect Drawing Changes," on the back of the PTO-948 (Rev. 03/01, or earlier) form.

INFORMATION ON HOW TO EFFECT DRAWING CHANGES

1. Correction of Informalities -- 37 CFR 1.85

New corrected drawings must be filed with the changes **incorporated** therein. Identifying indicia, if provided, should include the title of the invention, inventor's name, and application number, or docket number (if any) if an application number has not been assigned to the application. If this information is provided, it must be placed on the front of each sheet and centered within the top margin. If corrected drawings are required in a Notice of Allowability (PTOL-37), the new drawings **MUST** be filed within the **THREE MONTH** shortened statutory period set for reply in the Notice of Allowability. Extensions of time may **NOT** be obtained under the provisions of 37 CFR 1.136(a) or (b) for filing the corrected drawings after the mailing of a Notice of Allowability. The drawings should be filed as a separate paper with a transmittal letter addressed to the Official Draftsperson.

2. Corrections other than Informalities Noted by Draftsperson on form PTO-948.

All changes to the drawings, other than informalities noted by the Draftsperson, **MUST** be made in the same manner as above except that, normally, a highlighted (preferably red ink) sketch of the changes to be incorporated into the new drawings **MUST** be approved by the examiner before the application will be allowed. No changes will be permitted to be made, other than correction of informalities, unless the examiner has approved the proposed changes.

Timing of Corrections

Applicant is required to submit the drawing corrections within the time period set in the attached Office communication. See 37 CFR 1.85(a).

Failure to take corrective action within the set period will result in **ABANDONMENT** of the application.
